Control Sony FX9 with Browser Control (no monitoring)

Sony FX-9 Camera Setup:

Network> Access Authentication > Create **User Name** and **Password** Network> Wireless LAN > Setting> **Access Point Mode** Network> APMode Settings> Where you find **Camera SSID** (network name) and **Password** and **IP Address** of the camera

Web Browser Set Up:

Search for Sony FS-9 created network. Address will include camera serial #

Open your web browser and enter **http://IP address of camcorder/ rm.html** If the camera IP address is 192.168.122.1, enter http://192.168.122.1/ rm.html in the address bar.

You can check the IP address of the camcorder on the Network Status screen

You will be prompted to enter the camera **User Name** and **Password**

Log in to 192.168.122.1:80		
Your password will be sent unencrypted.
